## Profile

A 19-year-old university student interested in data analytics and programming. I have worked on multiple projects in the past, which have helped me gain confidence, great communication skills, the ability to adapt well, and work well under pressure. My analytic mindset mixed with my calm personality is a good combination. The eagerness and hunger to learn never leaves me. I've grown up in an entrepreneur family and a key value I was taught was commitment to your own work. We moved a lot, and even lived in America. Living in that environment has taught me punctuality and the ability to get to know and work well with others. I have various interests and love achieving a deeper understanding for different people, cultures and ideas.

## Work experience

### PSIL (Päivölä Student Innovation Lab), Valkeakoski

Software Developer, 06/2019 - 05/2021

In PSIL we worked whilst studying. We worked various gigs provided by partnered companies, which lead us to participate in various projects. I myself worked in Data science, Webdev, and Software development projects.

### Hämeen Projektitekniikka Oy, Tampere

Technical support

Providing Tech support and time saving solutions. Helping with domestic issues and tech related difficulties.

## Education

### Bachelor of Business Management | 08/2021 - Ongoing

Häme University of Applied Sciences (HAMK), Hämeenlinna

Studying in the Computer Applications program. All my courses have been tied to Computer science, and we have completed them with a business implication.

### Matriculation examination | 06/2019 - 06/2021

Päivölän Matematiikkalinja, Valkeakoski

Graduated from the Matematiikkalinja in Päivölä. Whilst studying I lived there and got to work with many likeminded people.

## Languages

Finnish  
English

Native  
Fluent

## Skills

Programming with Python & Java. Databases with SQL. Robot Framework, Docker, JIRA, Project Management. Participated in the TuKoKe competition in the past, experience with writing a research paper.

## Hobbies

Recently I have started taking exercising very seriously. I go to the gym 5-7 times a week and enjoy it a lot. In addition to working out, I love learning new concepts on my own, which is why coding is a passion of mine. On my free time I enjoy spending time with my friends from all over the world.
